

## **Adding GoJade Email to Apple's Mail Application** **(iPhone, iPad, Mac)**

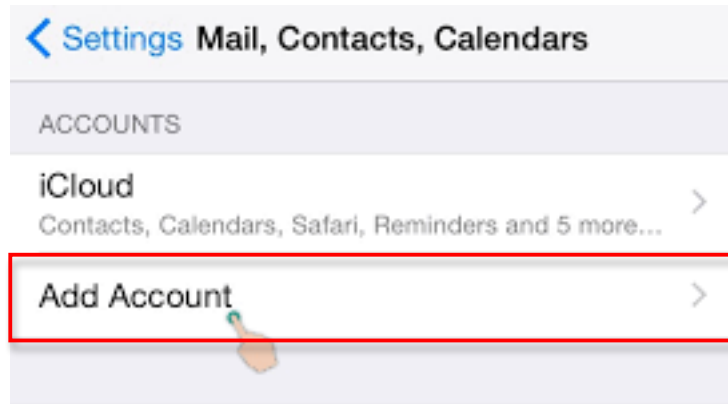

1. Click on Settings icon

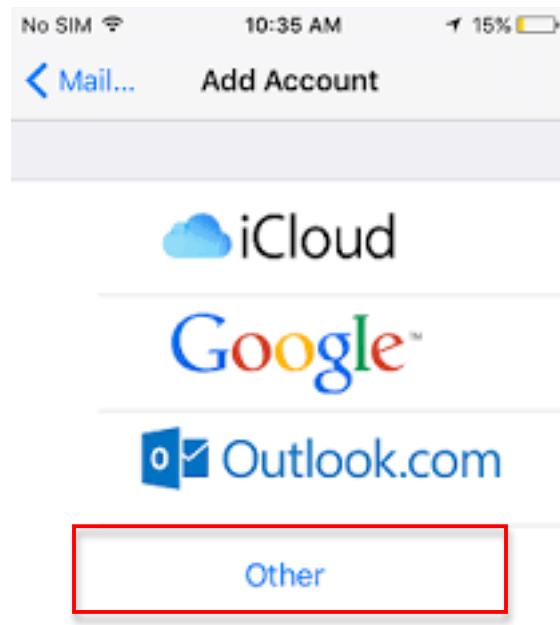

2. Click on Mail, Contacts, Calendars

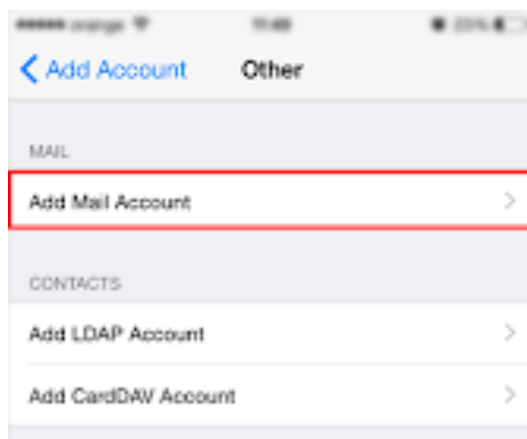

### 3. Select Add Account

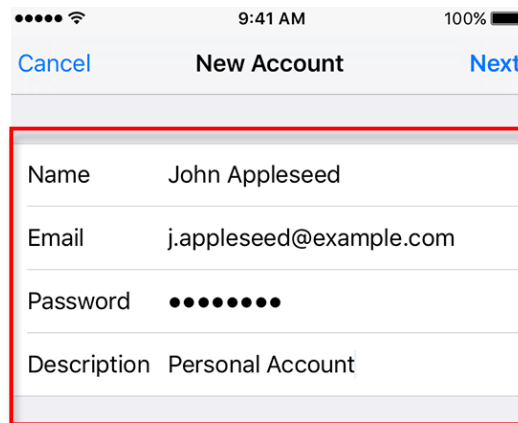

### 4. Select Other

### 5. Choose Add Mail Account

6. **Add** your credentials (Name, Email, Password, Description)

A screenshot of an iPhone 'New Account' screen. The status bar at the top shows signal strength, Wi-Fi, 9:41 AM, and 100% battery. The screen has three buttons at the top: 'Cancel', 'New Account', and 'Next'. Below these are four rows of text: 'Name John Appleseed', 'Email j.appleseed@example.com', 'Password ●●●●●●●●', and 'Description Personal Account'. A red rectangular box highlights the entire content area below the top buttons.

7. **Select** POP

A screenshot of an iPhone 'New Account' screen. The status bar at the top shows 'Optus 3G', '2:19 pm', and '41%' battery. The screen has three buttons at the top: 'Cancel', 'New Account', and 'Save'. Below these are two buttons: 'IMAP' and 'POP'. The 'POP' button is highlighted with a red rectangular box. Below the buttons are three rows of text: 'Name Your Name', 'Email yourname@yourdomain.com', and 'Description example'.

8. **Add** 'mail.gojade.org' to Host Name

9. **Add** your email address under User Name

10. **Add** smtp.gojade.org to SMTP

A screenshot of an iPhone 'Incoming Mail Server' screen. The title is 'INCOMING MAIL SERVER'. Below it are three rows of text: 'Host Name mail.gojade.org', 'User Name sample@gojade.org', and 'Password ●●●●●●●●'. Below these is a section titled 'OUTGOING MAIL SERVER' with one row of text: 'SMTP smtp.gojade.org >'. A red rectangular box highlights the entire content area below the title.
