## Why does my current Wi-Fi have problems?

There are several key factors that impact your internet and Wi-Fi performance:

- **An old router with outdated firmware** can be a primary cause of speed and performance issues. With Jade's managed service, we make sure you have the latest technology and that it stays updated with the latest firmware and security.
- **The placement of your old router** could be causing problems as well. We'll make sure your new Wi-Fi system is ideally located to ensure seamless wall-to-wall coverage.
- **Weak signals from inexpensive Wi-Fi solutions** can cause significant coverage problems. Jade's new BLAST system ensures a consistently strong signal throughout your home and business.
